Trading Platform Technical Capabilities

1 Comprehensive Accessibility Across Devices

The platform is available in **desktop, web, and mobile versions**, with a **PWA** option and dedicated apps for **Android and iOS**, ensuring brokers can provide traders with seamless access from any device or operating system.

2 Multiple trading backend integration

The platform offers a choice of expanding integrations with industry-leading providers (Metaquotes, FIX API, own trading engine).

3 Multilingual interface

The platform supports **over 20 languages** (English, Chinese, Arabic, German, Spanish, etc.), making it ideal for brokers targeting diverse markets.

4 Multiple account entrance

The Platform supports multiple accounts entrance thanks to which clients can switch between trading accounts with one click.

5 Integrated Copy Trading

With native copy trading functionality, brokers can attract a wider user base by enabling traders to act as **masters** or **followers**, sharing strategies or replicating trades. Solution offers **commission-based structures** for master traders. Brokers can enable or disable copytrading, which is flexible for meeting their unique business models.

6 One-click trading support

Allows for rapid order execution without unnecessary delays, enhancing efficiency.

7 Advanced Analytical Tools and Insights

The platform stands out with its powerful analytical engine, offering:

- A diverse range of chart types, technical indicators, and drawing tools.
- Access to real-time trading ideas and insights from experienced traders.
- Integrated market intelligence from leading providers like Acuity, Trading Central, TradingView, and more.

8 User-Friendly and Innovative Trading Experience

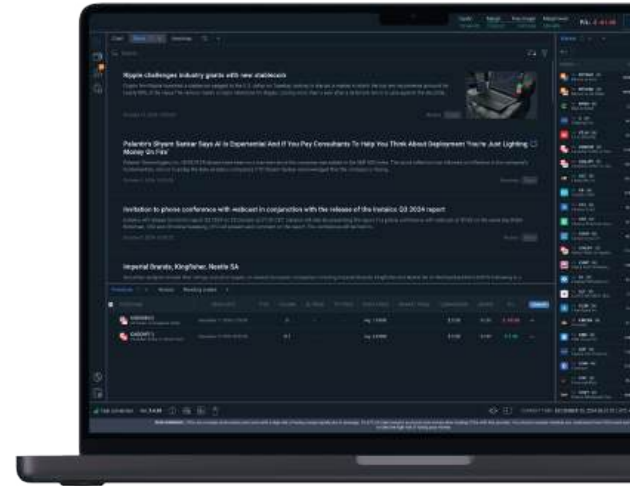

The platform includes trading ideas feature parsing insights from experienced traders across different assets. Features like economic calendars, market news, and heat maps ensure traders are always well-informed. Our **unique AI based news parsing engine** allows configure multiple choice of economic news providers tailored to traders needs.

9 Configuring an individual trading workspace

Fully adaptive design supports opening multiple charts in one or more windows (up to 6). The Platform also has its own natively integrated chart tools that allow it to apply a set of technical indicators, smart zoom, drawing tools, etc.

10 Comprehensive Reporting and Insights for Clients

The platform provides complete transparency with detailed reports on trading instruments as well as insights on market sentiment, trading volumes, and price changes.

Major Integrations

Our development team is focused on customer needs and future-proof development. This ensures that we can seamlessly integrate all necessary third-party services and tools, providing you with a robust and adaptable solution.
